Having just completed training as a Full Stack Web Developer, I am seeking a trainee/junior Developer position. Over the course of my training, I developed a passion for building stunning and responsive websites, web-applications, and games. I specialise in using front-end and back-end technologies such as jQuery, React, Next.js, Bootstrap and Express utilising several coding languages (JavaScript, Python, HTML5, CSS, PHP and Typescript) to bring unique ideas to life. I'm also capable in the maintaining of databases using SQL and maintain them with PostgreSQL and MongoDB. I've a want to adapt in both self-starting and collaborative environments as well as expand my knowledge of coding practices and technologies. I'm currently building upon my programming arsenal by bettering my understanding of technologies and learning new programming languages such as Java and C#.

## EDUCATION, EXPERIENCE AND EMPLOYMENT HISTORY

### SKILLS AND EXPERTISE

- JavaScript, HTML, CSS, Python, SQL, PHP, Typescript, C++, Java, C#
- Node.js, React, jQuery, Bootstrap, Next.js, PostgreSQL, Express, MongoDB, Angular
- Proficient in Microsoft office programmes
- Command Line
- Git & Github
- Full-Stack engineering

### LANGUAGES
